THE PERFECT RETAIL SOLUTION

U.S. Payment Service in cooperation with a major processor has combined state-of-the-art electronic cash register (ECR) equipment with integrated credit card processing. Delivering the ultimate payment solution, completely free of charge!

This integrated technology is the first of its kind. It eliminates the need for a separate credit card terminal at your business location. Now have the ability to handle all transactions directly through this advanced ECR.

This stylish and functional cash register was designed specifically for the retail environment. Thirty department keys will be customized to meet any individual operational needs. This register has the ability to store up to 2,000 PLU numbers. It is the ideal solution for all retail businesses and comes complete with cash drawer and backlit customer display.

INTEGRATED PAYMENT PROCESSING

Each cash register is equipped with an integrated PCI PED compliant credit card payment terminal. It enables fast and user friendly payment options. This secure device supports either dial-up or Ethernet connectivity. Its sleek, compact design fits easily in the palm of your hand. With a wide array of convenient features, it is the perfect device to streamline your electronic payment system.
